

Mega Master Technology

eFoam Recycled Materials (R Series)

Mega Master Technology's eFoam products, crosslinked polyolefin foam, is produced with clean production processes with emphasis on the restraints of air, water, waste, toxicant, odor, noise and radiation reduction. High weather-resistance and easy workability provide our clients the best quality and performance, effectively reducing the costs on material and production.

The eFoam R Series is in compliance with GRS (Global Recycled Standard), and contains up to 95% of recycled materials.

- Available density: 25-300kg/M3
- UL file classification HF-1
- In compliance with REACH regulation
- In compliance with RoHS
- Thermal conductivity:
Maximum 0.0341W/mk@23°C (ASTM C518)
- Water absorption rate: 0.0003% (JISK 6767)
- Water vapor transmission:
0.158g/m².hr (ASTM E96)
- Effective operating temperature: -80~ 110°C
- Excellent weather resistance
- Excellent Compression Resistance
